HELLO

I'm Justin. I like building user interfaces. Also, burritos.

I have over 15 years of experience working on everything from marketing websites to large data driven applications. I enjoy working with teams to deliver the best user experience possible.

EXPERIENCE

New Relic Senior Software Engineer Oct. 2018 - Present

As a member of the Distributed Tracing team my responsibilities include: React development, process & tooling decisions, reliability, and automated testing.

- Worked with design and PMs to deliver big new features
- Refactored large areas of the codebase to improve maintainability and performance
- Reduced bundle size by more than 50% (while shipping new features, too)
- Developed solutions for parsing and displaying large datasets
- Improved unit and e2e test coverage

Koan Senior Frontend Engineer Nov. 2016 - Oct. 2018

Part of the founding team. Created the initial version of the React application, improved tooling & build processes, and worked closely with designers, engineers, customers, and founders to define and build features.

Cengage Senior Application Architect Oct. 2015 - Oct. 2016

Pathbrite (below) was acquired by Cengage. My responsibilities here included maintaining the Pathbrite platform, developing new features, and participating in research and road-map planning.

Pathbrite Lead Frontend Engineer Mar. 2013 - Oct. 2015

Pathbrite was a portfolio platform, assessment, and LMS for teachers, students, and employers. I worked in a large Backbone.js application and developed new features, improved reliability, optimized for mobile, and improved code maintainability.

Luxurious Animals Senior Interactive Developer Jul. 2008 - Mar. 2013

Engineered, designed, and animated advertising solutions for brands like HBO, Morgan Stanley, and Porsche. Projects included websites, games, applications, ads, and commercials with tight deadlines and high standards.

Big Spaceship Design & Animation Internship Jun. 2007 - Sept. 2007

Summer internship. Worked on a marketing site for Universal.

Blue Pixel Studios Freelance Jun. 2006 - Aug. 2008

Design and development work for small businesses in my hometown.

STRENGTHS

Javascript   React   Redux   Typescript   CSS   UX   CI

EDUCATION

RIT New Media Design & Imaging 2004 - 2008
